- Developed a fully responsive Real-time Chat App using **React**, and **Chat Engine API** with advanced UI/UX design features.
- Implemented Signup and Login, Send Real-time messages, Pictures, and Files, User Search, Online/Offline features, and more.

Experience

Designer

Hirsh Bedner Associates

San Francisco, USA

01/2022 - 10/2022

- Consulted on a full range of luxury hospitality designs worldwide including interior and exterior design, artwork, custom furniture, fixtures, and equipment (FF&E) from schematic design planning to accomplished implementation.
- Led the design and implementation of 226 guestrooms, restaurants, restaurant patios, artwork, and FF&E of the Hilton Hotel in San Jose.
- Led the design and implementation of 36 guestrooms, an entry vestibule, artwork, a mural, and FF&E of the Fairmont Hotel in Jasper, Canada.
- Managed of the implementation process by creating specifications, reviewing shop drawings, and selecting finish materials for 129 custom FF&E items of the dining area, and outdoor bar of the Valley Kitchen Restaurant in Carmel.
- Created a design proposal presentation including 2D, 3D design simulation images based on the research data that analyzed the characteristics of the facility, and surrounding Environment.
- Achieved project goals by managing project progress, prototypes, and finished materials; documenting and organizing project data; and working collaboratively with clients, manufacturers, and vendors to resolve issues.

Designer

PineB

New Jersey, USA

05/2020 - 12/2020

- Consulted for commercial space designs, including interior and exterior design, artwork, and FF&E from initial design planning to successful execution.
- Led the design and implementation of office, exhibit centers, showrooms, artwork, and FF&E of the newly built 64-foot tall, three-story LG Electronics United States headquarters building in Englewood Cliffs.
- Produced a design proposal that displays 2D, 3D design simulations based on the research data that surveyed the identity of the LG brand, international LG stores, and the surrounding environment.
- Managed the successful implementation of custom FF&E to display LG products in the showroom and event hall. Collaborated with manufacturers, and clients to review FF&E shop drawings based on the specifications that organized the dimensions and features of LG products.
- Supervised construction site at the LG office to ensure the correct installation of FF&E in the building. Communicated with clients and contractors in real-time to resolve issues and updated architectural drawings for changes.
